DAS RECYCLER™

"CLOSE LOOP" SYSTEMS THAT MAKES YOU SAVE MONEY AND RECYCLE WATER

**ZERO
DISCHARGE
CLOSE
LOOP**

DAS Recycler™ – Close Loop.

Don't discharge your wastewater at all. Completely recycle your wastewater with a DAS RECYCLER system, and continuously reuse the same water.

Your existing open-loop operation becomes an environmentally clean close-loop system with zero discharge.

DAS RECYCLER™

**WE ARE
FLEXIBLE
ANY FORM
AND SHAPE**

DAS Recycler™ Undergoes vigorous testing before it is sent to client. Once installed you have the confidence of trouble free operation.

The DAS Recycler™ Any form and shape. The DAS Recycler™ can be delivered as a skid mounted system and ready to be operated once it arrives at destination.

This means that you can be in compliance with new and strict regulations in a big hurry.

Save our water for next generations to come and save in the process.

UPGRADE FACILITIES – RECYCLE WATER – REDUCE COSTS

**COMPLETE
SLUDGE
HANDLING**

The DAS RECYCLER™ is a fully automatic wastewater recycler that processes dirty water into clean reusable water. It has proven especially effective in removing oil, grease, heavy metals, solids and other contaminants from water used with pressure washers, steam cleaners and similar types of cleaning equipment. The DAS RECYCLER eliminates pollution problems by taking the waste out of the wastewater through recycling and reuse. The waste residue is reduced to a small easily disposable semi-dry cake.

DAS RECYCLER™ MAIN FEATURES

- Provides easy and cost-effective environmental regulations compliance.
- Prevents pollution from wastewater discharge by converting existing open-loop operations into environmentally safe close-loop systems.
- Is a simple, economical and reliable process for producing clean reusable water.
- Eliminates the need and cost of discharging waste water into a sewer, and avoids the expense of hauling large volumes of liquid waste to a toxic dump site.
- Skid mounted for easy installation and operation.
- Saves water and reduce monthly water bills.

APPLICATIONS

- Bus, Cars & Truck Washes
- Construction Companies
- Equipment Rental Firms
- Heavy Equipment
- Industrial Engine Cleaning
- Oil Drilling Rigs
- Pressure Washer Users
- Steam Cleaner Users
- Steel Mills
- Waste Water Discharge
